About Me

Recent Bachelor of Science in Information Systems graduate with hands-on experience in developing database-driven web applications using PHP, JavaScript, MySQL, HTML, and CSS. Experienced in designing relational databases, developing CRUD functionalities, generating reports, and implementing role-based user access. Passionate about building reliable, user-friendly web applications and eager to contribute to a collaborative development team while continuously learning modern web technologies.

Technical Skills

- **Languages:** PHP, JavaScript, SQL
- **Database:** MySQL, Database Design, ERD, Normalization, SQL Queries
- **Tools:** VS Code, Git, GitHub, phpMyAdmin, Google Apps Script
- **Concepts:** CRUD Operations, Responsive Design, Authentication & Authorization, Form Validation, Report Generation (PDF/Excel export)

Education

- **Bachelor of Science in Information Systems**
University of Camarines Norte 2022 - 2026
College of Computing and Multimedia Studies

Awards & Honors

- **Academic Distinction**
- **Best in OJT** - Examination Registration and Payment System, Client Records Management System & Task Monitoring System
- **Best in Capstone** - Integrated Health Referral & Records System

Projects

- **Integrated Health Referral and Records System**
Web-based health information system for Barangay Health Stations and the Rural Health Unit
A full-featured system for managing patient referrals and health records across facilities, streamlining clinical workflows and improving coordination between healthcare providers.
- **Examination Registration and Payment System**
Online registration and payment management system
An end-to-end registration system with integrated payment processing and dynamic scheduling for users and administrators, with automated confirmation and real-time slot management.
- **Client Record Management System**
Built with Google Apps Script
A lightweight records management solution built on Google Apps Script, enabling efficient client data storage, retrieval, and reporting entirely within the Google Workspace ecosystem.
- **Task Monitoring and Management System**
Built with PHP and ReactJS
A task tracking and monitoring tool that helps teams manage assignments, track progress, set deadlines, and stay organized — with status dashboards and real-time updates.

Relevant Strengths

- Web Application Development
- Database Management
- Problem Solving & Debugging
- Willingness to Learn New Technologies
- Team Collaboration
- Analytical Thinking
