## PROFILE SUMMARY

Recent Bachelor of Science in Information Systems graduate with hands-on experience developing database-driven applications and business systems implemented in real organizational settings. Experienced in business process analysis, relational database design, system development, reporting, and user support. Passionate about solving business challenges through technology, working with data, and building practical solutions that improve operational efficiency. Eager to contribute, continuously learn, and grow in a collaborative professional environment.

## EDUCATION

University of Camarines Norte

2022 - 2026

- Bachelor of Science in Information Systems

## AWARD & HONORS

- **Academic Distinction**
- **Best in OJT** - Examination Registration and Payment System, Client Records Management System & Task Monitoring System
- **Best in Capstone** - Integrated Health Referral & Records System

## WORK EXPERIENCE

Psy Systems & Innovations, OPC (MIS Intern)

FEB 2026 - MAY 2026

- Assisted in the analysis, design, development, and maintenance of three web-based information systems used by the organization.
- Analyzed business processes and gathered user requirements to develop practical system solutions that improved operational workflows.
- Designed relational databases and implemented database-driven features using PHP, JavaScript, MySQL, HTML, and CSS.
- Provided user support by troubleshooting system issues, resolving technical concerns, and implementing enhancements based on user feedback.
- Generated reports, maintained data accuracy, and assisted with data entry and database management.
- Collaborated with team members throughout system development, testing, deployment, and ongoing system maintenance.

## TECHNICAL SKILLS

---

- Languages: PHP, JavaScript, SQL
- Database: MySQL, Database Design, ERD, Normalization, SQL Queries
- Tools: VS Code, Git, GitHub, Power BI, Google Apps Script
- Concepts: CRUD Operations, Responsive Design, Authentication & Authorization, Form Validation, Report Generation (PDF/Excel export)

## LANGUAGES

---

- English — Professional Working Proficiency
- Filipino — Native Proficiency

## PROJECTS

---

- **Integrated Health Referral and Records System - Web-based Health Information System**

**Role: Project Lead, Systems Analyst, Database Designer & Full-Stack Developer**

Developed a web-based health information system for Barangay Health Stations and the Rural Health Unit to digitize patient referrals and medical records. The system streamlines referral workflows, centralizes patient information, and improves coordination between healthcare providers. The project is planned for implementation by the Municipal Health Office to support healthcare service delivery.

- **Examination Registration and Payment System - Online Registration and Payment Management System**

**Role: Systems Analyst, Database Designer & Back-End Developer**

Developed an online registration and payment platform implemented for nationwide organizational use, automating applicant registration, schedule management, and payment processing. The system features dynamic slot allocation, integrated online payments, QR code verification, and real-time status updates to improve operational efficiency and enhance the registration experience for examinees.

- **Client Record Management System - Built with Google Apps Script**

**Role: Systems Analyst, Database Designer & Full-Stack Developer**

Developed a lightweight client records management system using Google Apps Script and Google Sheets, implemented by the host training establishment to streamline client record management, data entry, and report generation. The system continues to support daily operations and maintains thousands of client records.

- **Task Monitoring and Management System - Built with PHP and React**

**Role: Systems Analyst, Database Designer & Back-End Developer**

Developed a task monitoring system that helps teams assign tasks, track progress, manage deadlines, and monitor project status through centralized dashboards and real-time updates, improving team coordination and accountability.
